Midterm Activity #3 – ATM with Transfer Feature

Program Requirements

1. Create a Java program named **ATMTransferSystem**.
2. Assume the **initial balance is 7,000 pesos**.

===== ATM MENU =====

1. Check Balance

2. Deposit

3. Withdraw

4. Transfer

5. Exit

Transfer Feature

Ask the user to enter:

- Receiver Account Number
- Transfer Amount

Validation

- Transfer amount must be **greater than 0**
- Transfer amount must **not exceed the available balance**

If successful, display: **Transfer Successful**

Program Rules

- Use a switch statement to process the selected option.
- Use nested if, switch statement and while loop.
- Use if–else statements to validate withdrawal.
- Maximum withdrawal per transaction: 2,000 pesos.
- The program must repeat using a do-while loop until the user selects Exit.

Submission Format

- Submit the Java source code file (.java).
- The filename must follow this format: Section_LastName_FirstName_ActivityName.java
- Include screenshots of the program output showing the following:
    - User input
    - Program processing
    - Final output/result
- The screenshot must clearly display the entire console output.

Academic Integrity Policy

- Students must write their **own program**.
- The following are **not allowed**:
    - Copying code from classmates.
    - Sharing source code.
    - Downloading solutions from the internet.
- Students with **identical programs may receive a score of 0**.
